# Board of Directors Approves Revenue Increase for Jan. 2026

**Dave Page**  
General Manager

Following a thorough review of Whetstone Valley Electric Cooperative's financial forecast, budget, and projected revenue requirements for the coming year, the Board of Directors has approved an overall rate increase of 9.8%, effective Jan. 1, 2026, with the change reflected on Feb. 1 bills.

The 2026 budget calls for a total annual revenue increase of just over 14% above current rates. After careful consideration, the Board elected to implement a 9.8% increase at the beginning of the year, acknowledging that a mid-year increase will be necessary to recover the full revenue requirement. The amount of that mid-year adjustment will be determined based on actual and anticipated energy sales, as well as the remaining revenue needed to meet year-end financial obligations.

Whetstone Valley Electric operates under board-approved financial policy that establishes clear expectations for financial strength, stability, and compliance. As a not-for-profit cooperative, we are required by our lenders to meet minimum margin levels, maintain healthy financial ratios, and plan responsibly for both short and long-term needs. These standards ensure we can continue providing safe, reliable service while keeping our system healthy for the future.

### **The Primary Cost Driver: Rising Wholesale Power Costs**

As shared in previous newsletters, the largest factor driving the revenue increase is the continued escalation in wholesale power costs. In 2026, purchased power will make up approximately 55% of Whetstone Valley Electric's total operating costs, by far the single largest expense. Next year alone, Whetstone Valley Electric will require an additional \$775,566 just to cover the increase in wholesale power.

**Several major developments are contributing to these rising costs:**

- **Rising Energy Demand:** Electricity usage across the region continues to grow, requiring the development of new generation and transmission facilities. Basin Electric's long-term forecast now calls for accelerated construction timelines compared to earlier projections.
- **Large-Scale Capital Projects:** Basin Electric is planning approximately \$13 billion in infrastructure investments over the next decade. One significant project includes a \$782 million natural gas facility designed to help meet future demand. Projects of this scale typically take five to seven years to complete.
- **Reserve Requirements:** Our regional transmission organization has increased reserve capacity requirements to maintain grid reliability during peak or extreme conditions. Meeting these requirements adds pressure to build or secure additional energy resources.
- **Market Instability:** Volatile wholesale energy markets make power purchases more unpredictable and costly.
- **Inflation:** Higher prices for materials, labor, and equipment continue to affect the cost of generating and delivering electricity.

While Basin Electric's growth across its nine-state region helps spread costs among more consumers, the combination of demand growth, major infrastructure needs, and inflation has made wholesale power increases unavoidable.

### **Local System Investment and Rising Expenses**

In addition to wholesale power, Whetstone Valley Electric must also address rising interest, depreciation, and amortization expenses driven by higher borrowing costs and the increasing price of new construction. In 2026, the

*Continued on next page*

*Revenue Increase Continued*

cooperative plans to invest about \$2.5 million to replace aging distribution lines. With an average system age of 56 years, these upgrades are essential to maintaining the reliability, safety, and performance that members expect.

Operating and Maintenance expenses are also impacted by inflation, increasing by approximately 2.7% next year.

**Moving Forward Together**

Whetstone Valley Electric is not alone — cooperatives and utilities nationwide are managing similar upward cost pressures. We remain committed to open, transparent communication as we work through these challenges. Members can expect additional information in the months ahead outlining how rates will be structured to meet the full revenue requirement for 2026.

Thank you for your continued support of Whetstone Valley Electric Cooperative. Together, we will navigate rising costs while staying focused on what matters most: reliability, affordability, and dedicated service to our membership.

## Whetstone Valley Electric Sponsors \$2,500 Scholarships

Whetstone Valley Electric Cooperative and Basin Electric will be offering a \$2,500 scholarship to the dependent of a Whetstone Valley Electric Cooperative member. The scholarship is for the 2026-2027 school year.

Applicants for the scholarship must be a U.S. citizen and a dependent of a current member-system consumer of Whetstone Valley Electric Cooperative. They must be a student enrolled or planning to enroll in a full-time undergraduate or graduate course of study at an accredited, two-year or four-year college, university, or vocational/technical school. Individuals who have applied in previous years, but did not receive the scholarship, are eligible to apply again.

The scholarship recipient chosen will be based on SAT/ACT scores, overall grade-point average, work

experience, participation in school and community activities, a personal statement of career goals and a written recommendation by a third party.

Applications for the 2026 scholarship award are due in the Whetstone Valley Electric office on or before February 5, 2026. All applications will be forwarded to Basin Electric to be judged. The winner will be announced at the 2025 annual meeting.

Whetstone Valley Electric is a member of Basin Electric, which is a consumer-owned and controlled regional cooperative responsible for supplying wholesale power to nine Midwestern states.

For more information and a scholarship application form, contact Whetstone Valley Electric or your local high school guidance counselor.

# Tree Trimming Safety

Trees are majestic, beautiful and good for the soul. But we also know that our members depend on us to deliver reliable power to their homes and businesses. South Dakota's electric cooperatives strive to balance maintaining the beautiful surroundings we all cherish with ensuring reliable electricity. You might not realize it, but there are several benefits to regular tree trimming.

Keeping power lines clear of overgrown vegetation improves service reliability. After all, we've seen the whims of Mother Nature during severe weather events with fallen tree limbs taking down power lines and utility poles. While many factors can impact power disruptions, about half of all outages nationally can be attributed to overgrown vegetation.

Overgrown vegetation and trees also pose a risk to power lines. For example, if trees are touching power lines in our members' yards, they can pose grave danger to families. If children can access those trees, they can potentially climb into a danger zone. Electricity can arc, or jump, from a power line to a nearby conductor like a tree. A proactive approach also diminishes the chances of fallen branches or trees during severe weather events that make it more complicated and dangerous for line workers to restore power.

If trees and other vegetation are left unchecked, they can be-

### BENEFITS OF TREE TRIMMING

- ✓ Improves service reliability
- ✓ Speeds up restoration time
- ✓ Keeps crews & communities safe

come overgrown and expensive to correct. A strategic vegetation management program helps keep costs down for everyone.

When it comes to vegetation management, there are ways you can help too. When planting new trees, make sure they're planted a safe distance from overhead power lines. Medium-height trees (40 ft. or smaller) should be planted at least 25 ft. from power lines. Taller trees (over 40 ft.) should be planted at least 50 ft. from power lines. You can also practice safe planting near pad-mounted transformers. Plant shrubs at least 10 ft. from the transformer door and 4 ft. from the sides. If your neighborhood has underground lines, remember to contact 811 before you begin any project that requires digging.

Additionally, if you spot an overgrown tree or branch that's dangerously close to overhead lines, please contact your local electric cooperative.

We have deep roots in our community, and we love our beautiful surroundings. It takes a balanced approach, and our vegetation management program is a crucial tool in ensuring service reliability.

**"Watch for overhead power lines."**

**Jacob Ymker, Age 10**

Jacob reminds readers to watch out for overhead power lines. Great job, Jacob! Jacob's parents are Mark and Marion Ymker from Armour, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# Heart-Warming DESSERTS

Picture by Elena Veselova from Shutter stock

## APPLE BREAD

### Ingredients:

1/2 cup brown sugar  
1 1/2 tsps. cinnamon

*Mix in small dish & set aside.*

2 eggs (room temperature)

1/2 cup sugar

1 tsp. vanilla

1/2 cup melted butter or  
margarine

*Mix together in a bowl and add:*

1 1/2 cups flour

1 tsp. baking powder

1/2 tsp. baking soda

2 cups chopped apples

### Method

Pour 1/2 of the batter into a greased and floured bread pan. Sprinkle 1/2 of the cinnamon and sugar mixture over it. Add remaining batter and top with remaining cinnamon sugar mixture.

Bake at 350° for 45-60 minutes.

**Grace Klein**  
**Sioux Valley Energy**

## PUMPKIN CHEESECAKE DESSERT

### Ingredients:

1 cup heavy whipped cream  
8 oz. cream cheese, whipped  
1/3 cup sugar  
1/2 cup brown sugar  
1 can pumpkin puree  
1 tbsp. pumpkin pie spice  
1 tsp. vanilla  
1 pkg. cheesecake pudding mix

### Method

Beat 1 cup heavy whipped cream and set aside.

In a separate bowl, mix and beat the cream cheese, sugar, brown sugar, pumpkin puree, pumpkin pie spice, vanilla, and cheesecake pudding mix.

Fold the whip cream into this mixture and spread in a graham cracker crust.

Refrigerate two hours before serving plus add a spray of whip cream and sprinkle cinnamon on top.

(Optional) add chopped pecans or walnuts.

**Susan Forma**  
**Union County Electric**

## CHERRY COCONUT BARS

### Ingredients:

#### Crust

1 cup flour, sifted  
1/2 cup butter  
3 tsbps. powdered sugar

#### Mixture

2 eggs, slightly beaten  
1 cup sugar  
1/2 tsp. baking powder  
1/4 cup flour  
1/4 tsp. salt  
1 tsp. vanilla  
3/4 cup chopped nuts  
1/2 cup coconut  
1/2 cup red maraschino cherries, quartered

### Method

Mix together flour, butter and powdered sugar. Spread in 8" square pan. Bake at 350° for 20-25 minutes or until it is a delicate brown.

In a bowl, mix in the remaining ingredients in the order given: eggs, sugar, baking powder, flour, salt, vanilla, chopped nuts, coconut, maraschino cherries.

Spread this mixture over the crust and bake again for 25-30 minutes. cool and cut into squares.

**Barbara Anderson**  
**Lake Region Electric**

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2025. All entries must include your name, mailing address, phone number and cooperative name.

# Wood and Pellet Stove Efficiency Upgrades

**Miranda Boutelle**  
Efficiency Services  
Group

There is something special about the heat of a fire. It's cozy, comforting and a heat source for households across the country. Whether it provides primary or supplemental heat, a wood or pellet stove must operate safely and efficiently.

Here are some signs your stove may need to be replaced, according to the United States Environmental Protection Agency (EPA):

- You often smell smoke in the house with all the windows closed. Smoke can harm heart and lung health, especially among children and older adults.
- Smoke comes out of the chimney more than 15 minutes after a cold start or reload.
- Watery eyes and stuffy noses are common in your household when operating the wood stove.
- You must continually feed the stove with wood.

The EPA recommends replacing wood stoves manufactured before 1990 with cleaner, more efficient models. This can save you money and make your home safer by reducing fire risk and improving indoor air quality. It also reduces outdoor air pollution. If the back of your stove doesn't have an EPA label, it's likely more than 30 years old.

Next, start comparing equipment to find the best fit using the EPA Certified Wood Stove Database. It provides a list of wood and pellet stoves with efficiency ratings, sizes, heat outputs and other details. Local retailers can help you, too. Work with a reputable dealer who can explain the features most important to you. Don't forget to ask about the highest efficiency models.

Here are some things to consider when choosing

a new wood or pellet stove.

Modern wood stoves require less wood, produce less ash and emit almost no smoke. They come in catalytic and noncatalytic options. In catalytic models, smoke gases and particles are burned in a coated ceramic honeycomb, thereby increasing burn time and reducing air pollution. The operation of noncatalytic models is more standard. According to the U.S. Department of Energy, new catalytic wood stoves have efficiencies of up to 83% higher heating value – or amount of heat released – while noncatalytic models are typically in the 65% to 75% range.

A pellet stove is another option to consider. It burns compressed pellets made of wood or other biomass materials. Like a wood stove, there are free-standing units or inserts. It can burn cleaner and doesn't require hauling wood. Pellets are loaded into the hopper, which feeds them into the combustion chamber for burning. Most pellet stoves use electricity for the hopper and a fan to push warm air into the room. Plan to power them during an outage, if needed. Some models come with battery backup. An EPA-certified pellet stove has a 70% to 83% higher heating value.

Make sure the wood or pellet stove you select is properly sized for your home and heating needs.

Consider the cost of the fuel source – whether you have to buy wood, harvest it yourself or stock up on a specific type of pellet. Reduce fuel consumption and smoke by burning wood that is dry and seasoned, meaning it is split, covered and aged for at least six months. Do not burn trash or treated lumber indoors. It can create indoor air pollution and damage your wood stove. Burning softwood can lead to creosote buildup, which can cause chimney fires.

Installation by a certified technician ensures the job is done right, preventing chimney fires and indoor smoke. Have the stove cleaned and inspected by a professional annually. Also, install carbon monoxide detectors. Follow the manufacturer's specifications for burning materials and operation.

If your stove is acting up or not supplying enough heat for your home, consider upgrading to a new model to increase efficiency and keep your home comfortable this winter.

# KINGBIRD COFFEE

## Your Local Coffee Shop

Jocelyn Johnson

jocelyn.johnson@sdrea.coop

Tucked away in the heart of Brandon, S.D., sits Kingbird Coffee – a cozy, vibrant coffee shop built on the foundation of generosity and community spirit. Kingbird Coffee has blossomed from a simple act of love into a cherished gathering place that embodies hometown values and creative flair. It all began as a surprise.

“Technically, my wife, Jessica, owns it,” said Michael Gross, who purchased the coffee shop as a gift to his wife. “It was an impulse buy,” recalled Michael with a chuckle.

At the time, Michael felt his hometown lacked a proper coffee shop – a local hangout where neighbors could linger over coffee, connect and find a sense of belonging.

“Our inspiration is to be able to give back to the community,” Michael said.

True to that inspiration, Kingbird Coffee radiates generosity from its very core. Since opening, every cent of profit has gone directly back into the community – nurturing local events, student activities and charitable causes.

“My wife and I have never taken any money from the coffee shop,” Michael explained. “Everything we have made over the years has gone back into the community to support events or kids.”

Their commitment to fostering community shines through ongoing innovation and engagement. Now, the team is preparing to launch new extended hours, accompanied by themed nightly events – each designed to cultivate connections and celebrate local interests.

“We’re planning on having a different event every night,” Michael said. “Like Monday might be advanced board games. Tuesday might be about meeting a local pastor. Wednesday could be kids’ crafts night.”

This effort signifies Kingbird Coffee’s continual quest to be more than just a coffee shop: it is a place where everyone can find something to enjoy, every night of the week.

The eclectic atmosphere of the coffee shop invites you to stay awhile. Couches and nooks make for perfect reading corners, board games beckon to the playful, and even a whimsical swing under the stairs welcomes imaginative children.

“It’s just a fun little quiet vibe,” Michael described. “We have little hidden nook areas underneath the steps and a little swing where kids can go and hang out... there’s ‘take a book, leave a book,’ and board games. It’s just a fun place.”

Here, creativity isn’t just encouraged – it’s essential. While the owners handle behind-the-scenes work, they credit the employees and a dedicated events manager for shaping the everyday magic that keeps patrons returning.

Photo by Kingbird Coffee

Kingbird Coffee’s devotion to local flavor extends to every product sold. Beans are sourced from Parable Coffee Roasting Co., a local roaster in Tea, S.D. But the commitment to homegrown doesn’t stop with coffee. Local honey, jewelry, bison jerky, pizza, even handmade stockings from coffee bags, and flowers from a local florist – each item tells a story of community partnership. Artists hang their work for free, keeping a portion of sales and donating proceeds to local art initiatives. On weekends, the shop welcomes pop-up boutiques, allowing small business owners an affordable, supportive venue.

Signature drinks bring history to the present. The beloved “Billy King” remains on the menu in honor of Billy, the shop’s founder and namesake.

“We kept everything the same as if he’s still at it. Billy created it, and he’s a good friend of mine,” says Michael.

Such continuity gives regulars – and new customers – a sense of belonging and nostalgia.

Cultivating connections goes well beyond commerce. Employees past and present share a special bond, growing from high school baristas into college students and, often, friends for life.

“People don’t quit. They just...love it because they have the freedom to experiment and to make drinks,” he said, noting the murals and memories that fill the walls.

When asked to describe the shop’s personality, Michael laughs, “A crazy, wild teenager...you never know what’s gonna happen.” The unpredictable, energetic spirit is exactly what makes Kingbird Coffee so beloved – a hub that welcomes everyone, surprises often and gives back always.

For Kingbird Coffee, community isn’t a slogan – it’s a way of life, brewed fresh daily for everyone who walks through the door.

The South Dakota State Capitol  
in Pierre, S.D.  
Photo by Frank Turner

# CO-OPS AT THE CAPITOL EVERY VOICE COUNTS

**Frank Turner**

frank.turner@sdrea.coop

Electric cooperatives carry a wide range of responsibilities to the members they serve. Beyond keeping the lights on, co-ops represent their communities, focus on member needs and help strengthen the places they call home. But behind the scenes, cooperatives also stay actively involved in legislative discussions to stay engaged in the decisions that shape how they serve their members.

According to Steve Barnett, general manager of the South Dakota Rural Electric Association, legislative efforts help protect reliable electricity, keep costs manageable and support rural communities across South Dakota.

“While it’s important that we stay involved in the topics that are relevant to our industry, it’s really about sharing our values and telling our story,” Barnett said. “Being involved means being engaged and aware of the challenges and issues coming up in the 2026 Legislative Session,”

In addition to SDREA’s internal

leadership, legislative efforts are supported by the association’s lobbying team in Pierre, led by Darla Pollman Rogers of Riter Rogers LLP. Rogers and her colleague, Ellie Bailey, have been involved with SDREA’s legislative work for more than two decades.

“A key component of this work involves relationship building with legislators to establish trust and credibility,” Rogers said.

Rogers noted that member engagement strengthens the cooperative voice during session and throughout the year. “The grassroots approach is huge for co-ops,” she said. “Hearing from members across the state and from different cooperatives helps strengthen our overall impact.” Rogers added that one of the best ways members can get involved is by getting to know their local legislators or attending Co-op Day at the Capitol to observe the process firsthand.

With the next session approaching, several topics are already drawing the attention of not only electric cooperatives but utilities across the

state. One of the proposals SDREA is following closely is Rep. Kent Roe’s data center bill, identified as Draft HB 31.

“We’re seeing an increase in interest from large data center developers looking to site facilities in cooperative service territory,” said Chris Studer, chief member and public relations officer at East River Electric Power Cooperative, a wholesale power supply cooperative which serves distribution co-ops in eastern South Dakota and western Minnesota. “We have been providing input on the data center bill to make sure the law would fit within our process and require data centers to invest in generation and transmission infrastructure to serve them, so we can protect our current cooperative consumers from the risk of building generation to serve these large consumers. At the end of the day, we’re not going to put our member-owners at risk, and engaging with lawmakers working on that issue is very important to our cooperative network.”

The association has also been working

with investor-owned utilities on wildfire mitigation legislation, which stands out as another priority for South Dakota cooperatives.

“Wildfire risk is a growing concern, and this proposal gives utilities a clear, consistent way to plan ahead. At its core, this legislation is about preparedness – making sure utilities have a plan and have reviewed it with their governing authority. By strengthening infrastructure, improving vegetation management, and coordinating closely with communities, the framework helps protect public safety while supporting the reliable service South Dakotans depend on,” Black Hills Electric General Manager Walker Witt said.

Cooperative members also have an important role in legislative advocacy. Their engagement helps ensure that rural needs and perspectives reach decision makers. Barnett encouraged members to stay active by reaching out to local lawmakers in their districts and attending local legislative forums and cracker barrels. These are formal town hall style gatherings where legislators answer questions and update the community.

“Members can contact legislators in their respective districts via email or by telephone,” Barnett said. “Attending cracker barrels is also a good way to stay engaged. These opportunities give members a chance to hear updates, ask questions, and share how policy decisions affect their communities.”

Barnett also noted the importance of staying alert during the legislative process, particularly when a bill is significantly amended. He explained that when a bill gets “hog housed,” it means it has been changed so much that the original version is no longer recognizable. “A hog housed bill is changed or amended significantly, to the point where a person may change their position on the bill,” he said. “Tracking these changes is essential to understanding the real impact a proposal may have if it becomes law.”

Barnett said SDREA will continue to represent the interests of both cooperatives and rural communities across the state. At the end of the day, it’s all about providing dependable electricity and keeping the lights on.

Gov. Larry Rhoden takes a picture with members of the electric cooperative network at Co-op Day at the Capitol last February.

*Photo by Jocelyn Johnson*

## STAYING INVOLVED

### Co-op Day at the Capitol

Electric cooperatives’ efforts to engage local legislators extend far beyond traditional lobbying. Every February, cooperatives from across the state gather for a light-hearted dinner at the South Dakota State Capitol to break bread with lawmakers, provide attendees industry updates and sit in on legislative committee meetings.

Last year, South Dakota cooperatives continued their time-honored tradition of serving pulled pork sandwiches and cowboy beans prepared by Ken Gillaspie, who formerly served as a director for East River Electric and as board president for Oahe Electric, and Roger Crom, a former loss control manager at SDREA.

The next Co-op Day at the Capitol is scheduled for Feb. 17, 2026.

### Legislative Banquets

In addition to Co-op Day at the Capitol, select electric cooperatives across the state host legislative banquets as a means of communicating the latest legislative environment with both their members and local lawmakers. Many times, these events provide a free meal to attendees and include updates on both the successes and challenges for the co-op.

Reach out to your local cooperative to learn more about local Legislative Banquets, Co-op Day at the Capitol or the latest legislative news affecting cooperatives. The co-op network is more than happy to engage.

# Upcoming 2026 WVEC Director Elections

Whetstone Valley Electric Cooperative is making plans for its 84th annual membership meeting. The 2026 annual meeting will be held on Thursday March 26, 2026 at 6:30 pm at the Wilmot School.

This year, three members must be selected to serve on the board of directors, all for three-year terms. The districts with open seats are as follows:

**District 1: Drywood Lake, Goodwill, Easter, Agency, Lawrence Townships**

**District 2: Becker, Lee, Lake Townships**

**District 5: Twin Brooks, Kilborn, Osceola, Mazeppa, Leola Townships**

Director nominations are by petition only. Petition forms are available at our headquarters at 1101 East Fourth Avenue in Milbank. A candidate must be a bona fide resident of the district and return a petition with at least six (6) signatures from current members of the same district to the Whetstone office not less than 40 days prior to the annual meeting.

Because of publication deadlines, to have a candidate profile published in the March issue of Cooperative Connections, petitions should be submitted on or prior to February 16, 2026.

The process for becoming a Director for Whetstone Valley Electric Cooperative, Inc. (WVEC) is contained in the Cooperative bylaws Article IV. Each candidate for a director

position, should carefully read the bylaws and understand the procedures. The bylaws can be found on our website, [www.whetstone.coop](http://www.whetstone.coop), or by contacting our office.

The Whetstone Valley Electric Cooperative board serves on behalf of the membership to provide oversight and strategic governance, while day-to-day operations are led by the cooperative general manager. The board is responsible for sending representatives to the associations of which the cooperative is a member. Directors are expected to attend education seminars and may be asked to serve on other associated cooperative boards.

Directors may be asked to lobby and remain informed on pertinent legislative issues. Reading and studying is necessary to keep informed of current issues and how they may affect the co-op. It is the responsibility of the board to evaluate and develop long-term strategic plans to assure the financial and operational stability of the cooperative. Directors should expect to commit about 30 days per year for cooperative related activities.

**In addition to the rewards of being a director, there are some important responsibilities. A director must:**

- **Be prepared to abide by and uphold the bylaws of the cooperative**
- **Be open to new ideas and have a desire to learn**
- **Be able to understand and engage members as their expectations change**

*Continued on next page*

**Whetstone Valley Electric Cooperative members contributed non-perishable food to the company's 18<sup>th</sup> annual food drive.**

**All members who donated food were submitted into a drawing for a \$60 bill credit. The winner of that drawing was Bernice Cizadlo.**

**We would like to express our sincere gratitude to all that donated.**

*Left to right: Bailey Anderson, Jessica Schuchard, and Dave Page*

*Front: Jon Christensen*

*Director Elections Continued*

- **Be adept at analyzing complex options to make sound decisions**

If you are interested in learning more about what it means to be director, please feel free to contact a board member or our General Manager.

**Whetstone Valley Electric Cooperative  
Non-Discrimination Statement**

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency that administers the program or contact USDA through the Telecommunications Relay Service at 711 (voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination Complaint and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: [program.intake@usda.gov](mailto:program.intake@usda.gov).

USDA is an equal opportunity provider, employer, and lender.

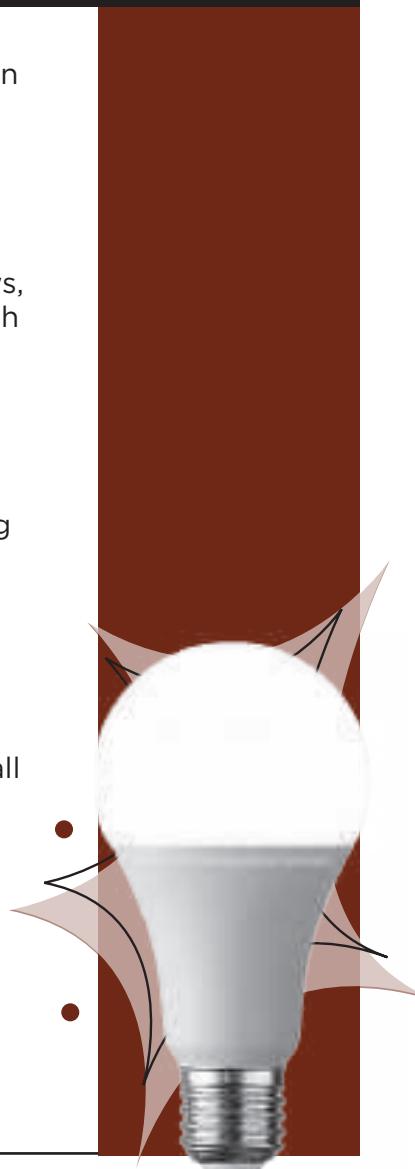

**UTILITY  
SCAMS**

Beware of “winter bill relief” energy scams. Scammers often exploit high winter bills by offering fake discount or relief programs. They may ask for upfront payments or personal details to lower your rate. Legitimate utilities never demand gift cards, wire transfers or payments through apps like PayPal or Venmo. Always verify offers directly by calling your utility’s phone number located on your energy bill — do not call any phone numbers provided in a suspicious email or text. Remember to take time to confirm before you pay; real savings programs won’t pressure you for immediate action.

## ENERGY EFFICIENCY

### TIP OF THE MONTH

Winter weather can cause your home heating system to work overtime. Check for air leaks and drafts around doors and windows, then seal them with weatherstripping or caulk. Close fireplace dampers when not in use, and consider installing insulating curtains to help keep warm air inside. You can also save energy by lowering your thermostat a few degrees. Even small adjustments like these can reduce heating costs and improve comfort during the coldest months.

# EASEMENTS BRING SAFETY, RELIABILITY

## Why More Room Makes Sense for Co-ops, Line Crews & Members

**Jacob Boyko**

jacob.boyko@sdrea.coop

Serving rural members means maintaining thousands of miles of power line – and finding the space to safely build and access it. At your local electric cooperative, building, maintaining and repairing thousands of miles of infrastructure is a logistical challenge, but each and every piece of the system has its role in a functioning and reliable electric grid.

That's why easements, or agreements to use and access private land, are essential for co-ops and their members. At East River Electric Power

Cooperative, the generation and transmission co-op serving 25 member distribution systems in South Dakota and Minnesota, Engineering and Planning Services Manager Jon Aus works directly with co-op members to get easements for power lines.

In 2025, most cooperatives prioritize building lines along the public right of way – the area between the road and fence lines along roadways – instead of along quarter lines like they have historically, back when rights-of-way were cluttered with telephone and other overhead lines.

"That's where we like it from an access and maintenance perspective,"

South Dakota law allows electric cooperatives to place poles along public rights-of-way without needing an easement. Shown here, East River Electric's transmission lines north of Pierre are built within the right-of-way. In cases where the rights-of-way are crowded, have obstacles, or are otherwise not suitable for poles or line work, a co-op may seek an easement outside of the right-of-way.

*Photo by Jacob Boyko*

Aus said of rights-of-way. "Nowadays, when we develop a route for a line, we pick the roads we want to zigzag down to get from Point A to Point B."

Placing infrastructure along roads improves accessibility for crews and speeds up outage response time, especially when mud or snow are a factor, Aus added. But the trade offs are a workspace limited to the shoulder and ditch and overall limited access to the infrastructure.

That's where easements make all the difference. When a co-op member allows an easement, the co-op will set poles back just several more feet away from the road right-of-way onto private land, and crews can cross behind the fence when they need to access the poles. The impact on private land is minimal, but it's a massive benefit for the line crews.

"Having an easement allows crews to work on the backside of the structures," Aus said. "If you don't get an easement and you don't have any access rights, they're stuck working everything from the ditch and the roadside."

Engineers are meticulous when mapping routes for new lines, Aus added, noting the lengthy process for engineers as they consider pole placement, obstacles, hazards and community impact.

"At the onset of any project, we're evaluating the impact of our routing," Aus continued. "Public impact is right up there on our priorities along with reliability and maintenance. We don't go down routes we foresee to have challenges with public impact."

Distribution cooperatives see similar challenges on the ground. In southwest South Dakota, Black Hills Electric Cooperative System Coordinator Jesse Sorensen aims to manage a system that's not only reliable and affordable, but also built on cooperation with members.

"Very rarely do we have someone reject giving an easement," he said. "We've had very good luck sitting down with members and explaining everything to them that there are hundreds – if not thousands – of landowners that allowed easements so we could get electricity to this property."

He continued, "The biggest concerns from landowners are about losing their trees or the aesthetic value of their property, and we'll work with landowners by rerouting lines to prevent cutting prize trees or installing lines in prime views."

At East River Electric, Aus' team fields similar questions from landowners, usually concerning specific pole placement and whether poles will interfere with field access, an approach or operation of large machinery. He says it's usually something the engineers can accommodate because ultimately, co-ops want to leave members' land as good or better than they found it.

"We'll even work with landowners to pay to replace any trees we have to remove if we obtain an easement from them," Aus said.

As the co-op steadily grows and expands its transmission system, East River Electric General Counsel Danny Brown stresses that the co-op relies on voluntary easements, and in its 75-year history has never used eminent domain to obtain an easement.

"Eminent domain is not something we ever want to use," Brown explained. "We try to educate and work with the property owners the best we can. At the end of the day, an easement is voluntary, and if we can't make it work from the right of way, we have to start thinking about changing our route."

But opting for alternate, less-efficient routes is a concession that can severely impact system reliability and leads to a higher price tag for co-op members to pay. Fortunately, Aus and Sorensen said most landowners understand the value of working with their cooperative for themselves and their community.

"There have been several times when landowners have said, 'Absolutely, bring that line through here,'" Aus recalled. "They want to improve their reliability, or they know that they just need more electricity in that area for whatever they might be doing on their property. Most of the time we're welcomed with open arms."

That willingness helps keep cooperative power moving across the countryside.

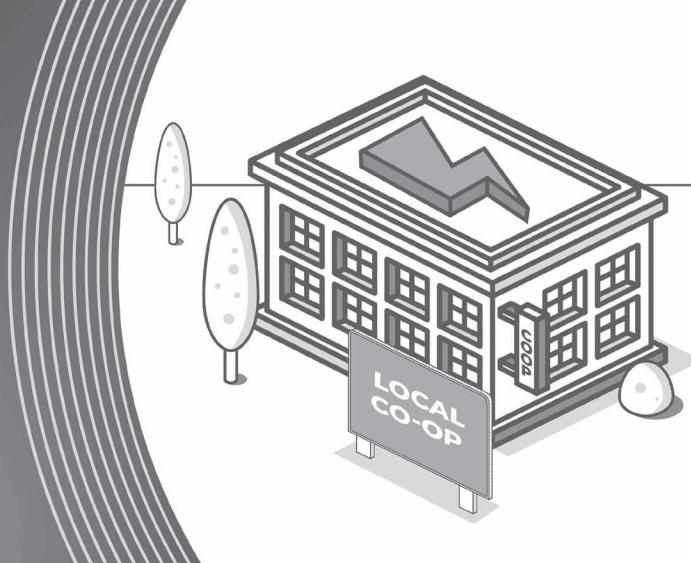

When a co-op obtains an easement to build a line along a road right-of-way, the line is placed several feet away from the right-of-way border. In this photo, the right of way border is about at the fence line, with the poles placed several feet behind the fence.

On this route, East River Electric has an easement for 30 feet behind the fence line for when line crews need to maintain or repair the line, giving crews more room to work and better access to the structures.

## Understanding the Three-Tier Co-op Structure

**Jacob Boyko**

jacob.boyko@sdrea.coop

### What Is an Electric Cooperative? (Tier 1: Distribution Co-ops)

An electric cooperative is a non-profit, member-owned utility governed by a member-elected board of directors. Co-ops are different from a typical utility because they don't report to shareholders; a co-op's responsibility is solely to the people it serves.

Member-ownership keeps the co-op focused on serving the interests of the community and maintaining low costs to members. Co-ops employ democratic principles; each member has one vote, which keeps control local and shields the co-op and members from outside interests.

Your local electric cooperative owns and maintains distribution power lines to serve members throughout its territory. While electric cooperatives' territories cover almost all of South Dakota, most of the state's population lives in cities and small towns and purchase electricity from a city-owned municipal power system or a for-profit investor-owned utility.

Most of the electric distribution cooperatives in South Dakota were organized by members beginning in the 1930s and 1940s to serve the rural areas that investor-owned utilities determined would not be profitable enough to be worth serving.

Rural residents formed co-ops, going

door-to-door collecting \$5 sign-on fees – a lot of money at the time – from their neighbors to kickstart the fledgling co-ops. They applied for loans from the Rural Electrification Administration to begin construction, and by the early 1950s, most rural South Dakotans were enjoying amenities made possible by electricity.

### Who Supplies My Co-op's Power? (Tier 2: Regional G&Ts)

East River Electric Power Cooperative in Madison and Rushmore Electric Power Cooperative in Rapid City are generation and transmission (G&T) cooperatives that sell electricity to a total of 27 distribution systems in South Dakota.

East River sells electricity to 19 member systems located in eastern South Dakota and six member systems in western Minnesota, while Rushmore sells electricity to eight member systems: seven located in western South Dakota and Cam Wal Electric Cooperative serving Campbell and Walworth counties in eastern South Dakota.

Both East River and Rushmore are governed by a board of directors comprised of directors from the distribution co-ops. Therefore, each distribution co-op receives one vote on its respective G&T's board.

Beyond selling electricity, East River and Rushmore assist their member systems in other areas; East River builds and maintains transmission systems to serve its member systems and offers support for information technology, marketing, public relations and economic development. Rushmore also offers marketing, PR and IT support, along with engineering services.

Two co-op systems in South Dakota are affiliated with neither East River nor Rushmore. Rosebud Electric Cooperative, based in Gregory, and Grand Electric, based in Bison, are part of District 9 – a collection of other distribution cooperative systems in Minnesota and North Dakota that purchase their energy from multiple sources rather than from a single supplier.

### Who generates my electricity? (Tier 3: Basin Electric)

Rushmore Electric, East River Electric, and District 9 systems including Rosebud Electric and Grand Electric purchase energy from Basin Electric Power Cooperative, a G&T cooperative based in Bismarck, North Dakota.

Just like the regional G&Ts it serves, Basin is governed by a board of directors representing its member systems. There are 11 directors on Basin's board, and they know the energy industry inside and out – after all, to serve on the Basin board, the directors must also serve on their local co-op's board as well as the regional G&T's board, and are elected by their colleagues to represent the co-op, board, and its members.

Currently, Mike McQuistion of the Fort Pierre area represents his local co-op, West Central Electric Cooperative, on Rushmore's board, and represents Rushmore on Basin's board.

Kermit Pearson of the Lake City area represents his local co-op, Lake Region Electric Association, on East River's board, and represents East River on Basin's board.

The cooperative systems that comprise District 9 also elect a director from

a District 9-affiliated co-op to represent them on Basin's board. Wayne Peltier from Minnesota Valley Electric Cooperative in Montevideo, Minn., represents Rosebud, Grand and the other District 9 co-ops on Basin's board.

Basin Electric was formed in 1961 by electric co-ops in the upper Midwest to generate and transmit electricity exclusively for cooperative systems to purchase. The system has grown to serve North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Montana, Wyoming, Colorado, and New Mexico.

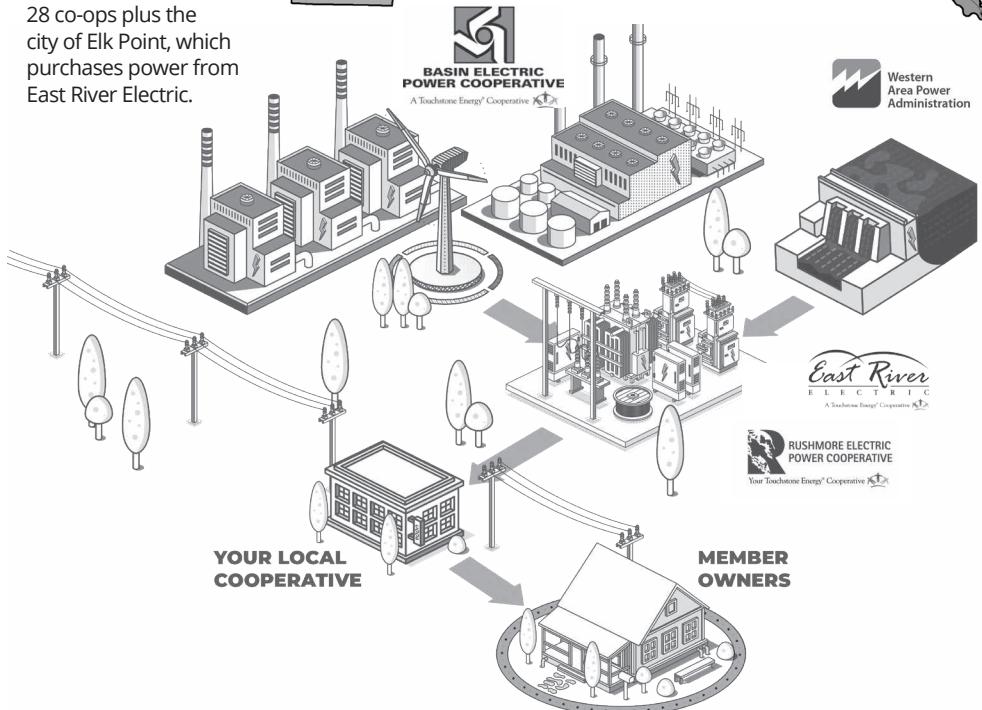

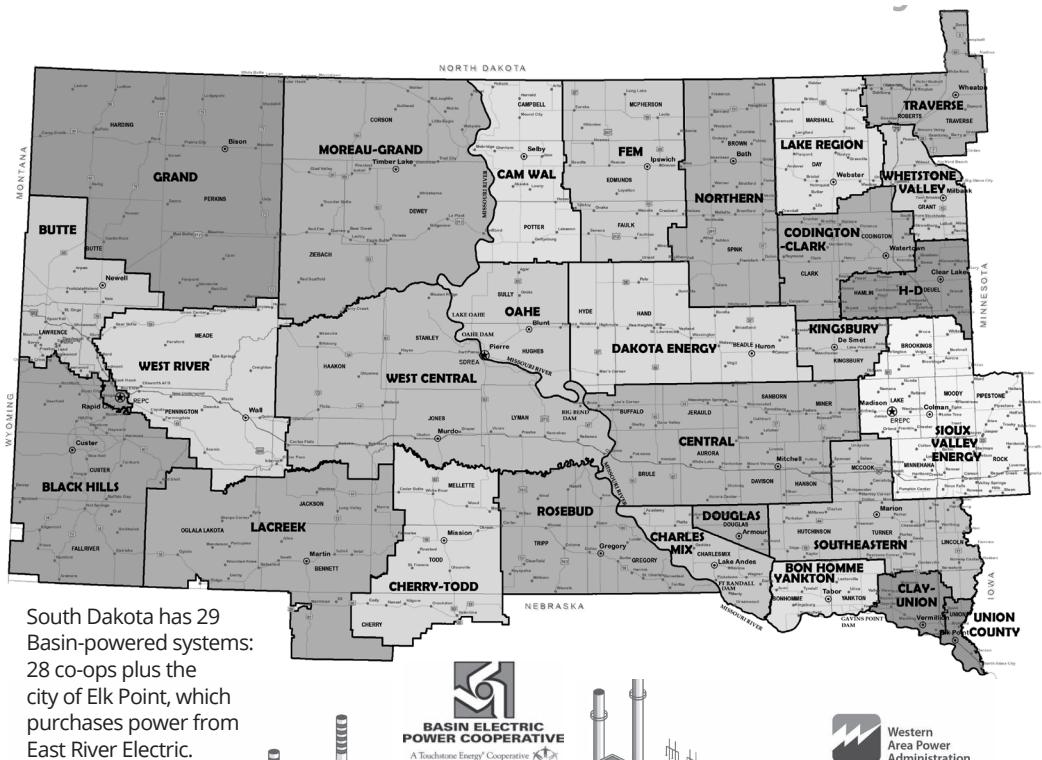

Basin Electric generates electricity using its owned and leased generation assets, which include coal, natural gas, solar, wind, oil and waste heat, with a maximum generating capacity of about 8,500 megawatts.

## Other Generation: Western Area Power Administration

East River, Rushmore and the District 9 systems also purchase an allocated amount of electricity from the Western Area Power Administration. WAPA is the power marketing administration under the U.S. Department of Energy that markets and transmits power from the U.S. Army Corps of Engineers-operated Missouri River dams and other generators in the western U.S.

WAPA purchases make up about 18% of East River Electric and 12% of Rushmore Electric's purchases, respectively. District 9 systems also purchase some of their electricity directly from WAPA.

Each year, WAPA transmits about 25,000 gigawatt hours of electricity across its 17,000-circuit mile transmission system. WAPA serves a 15-state region that includes North Dakota, South Dakota, Minnesota, Iowa, Wyoming, Montana, Nebraska, Kansas, Colorado, Utah, Texas, New Mexico, Arizona, Nevada and California.

## REGISTER TO WIN!

Bring this coupon and mailing label to the Touchstone Energy® Cooperatives booth at the Black Hills Stock Show & Rodeo to win a prize!

Your Phone Number: \_\_\_\_\_

Your E-mail Address: \_\_\_\_\_

To have your event listed on this page, send complete information, including date, event, place and contact to your local electric cooperative. Include your name, address and daytime telephone number. Information must be submitted at least eight weeks prior to your event. Please call ahead to confirm date, time and location of event.

### UNTIL DEC. 26

#### **Christmas at the Capitol**

8 a.m.-10 p.m. (Holidays Included)  
South Dakota State Capitol  
Pierre, SD  
605-773-3178  
[christmasatthecapitol.sd.gov](http://christmasatthecapitol.sd.gov)

### DEC. 20-21, 23-24, 27-28

#### **1880 Train Holiday Express**

Hot Chocolate, Santa  
Hill City, SD  
[www.1880train.com](http://www.1880train.com)  
605-574-2222

### DEC. 31

#### **New Year's Eve Bash**

Doors Open at 5:30 p.m.  
American Legion  
Sioux Falls, SD  
Tickets: 605-336-3470

### JAN. 10

#### **Knights of Columbus Coats for Kids Bowling Tournament**

1 p.m.  
Meadowood Lanes  
3809 Sturgis Rd.  
Rapid City, SD

### JAN. 20

#### **Prohibition & the Pig**

Lake City. Museum Fundraiser;  
Prohibition-Era Bootlegging  
6 p.m.-7:30 p.m.  
\$60 per ticket  
The Office Bar & Grill  
Madison, SD  
605-256-5308

### JAN. 22

#### **Gentleman's Quartet: Instrumental**

7 p.m.  
Johnson Fine Arts Center  
Aberdeen, SD

### JAN. 23-24

#### **Pro Snocross Races**

Deadwood, SD  
605-578-1876

### JAN. 30

#### **Box Elder Ball**

6 p.m.-8 p.m.  
Box Elder Events Center  
Box Elder, SD  
605-390-9341

### JAN. 30-FEB. 7

#### **Annual Black Hills Stock Show**
